## Our Vision

Bradfield Village Hall, almost 70 years old, no longer meets the needs nor expectations of our community. The Hall lacks facilities for those with disabilities, has little storage and has expensive, unreliable heating. Rental fees and local donations pay for not only the Hall but also the field, outside play facilities and the car park.

The plans, the result of consultations with users, user groups, locals and interested parties, will give the village a bright, practical and flexible Hall which will better support the free outside facilities.

## Funding

We have planning permission and our first priority is the Village Hall. So far about £365,000 has been raised towards a total of £2.2 m for the whole project: Hall, Playground & MUGA, as well as Site Improvements. We are actively working on reducing costs by use of engineering solutions.

- \* **Grants** from a variety of sources
- \* **Donations** from users, locals, companies, philanthropists
- \* **Loans** from individuals - possibly interest free - and banks specialising in charities
- \* **Fundraising Events** organised by the Hall, users and locals

## Our Design

A new, fit for purpose, **VILLAGE HALL** suitable for the activities of modern life. Including:

- \* **LARGE** and **SMALL HALL** allowing two concurrent events
- \* **COMMITTEE ROOM** suitable for small business meetings
- \* **KITCHEN** suitable for events catering
- \* **TOILET** on outside for play-ground users

And on site

- \* Inclusive **PLAYGROUND** with safe pedestrian access and enclosed area for Under 5s
- \* Well lit **MULTI USE GAMES AREA** with markings for a variety of sports and play
- \* **GARDEN** with space for occasional overflow parking to keep Southend Road clear
- \* Better and safer **PARKING** for hall and site users, shop customers, parents/carers on school run, walkers, etc.

## Comments from Locals

*"The plans are highly imaginative ... the village will have facilities to be proud of ."*

*"This thriving village deserves a modern hall suitable for the needs of the community."*

*"This forward looking project will ensure the village has excellent facilities , giving much more flexibility."*

*"A new hall will mean I can attend events I currently miss out on due to the lack of disabled access and suitable facilities."*

*"The new playground will create multiple fun, safe and age appropriate environs for our children."*

*"We need a place to meet up to combat loneliness and isolation."*

*"This building will be cost effective in terms of heating and future maintenance, and provide excellent facilities for future generations."*
